Quick start

Boat Rush Game

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

For more code information read the Construct2 Manual and dont forget read All the game documentation commented in game events

Sources in archive:

Project`s archive has next folders:

- a. **Source:**
Boat Rush CAPX
- b. **Game Sounds:**
Sound files
- c. **Game Art:**
Graphic sources in PNG, icons and assets.
- d. **HTML5:**
Exported Game
- e. **Docs:**
Developer_Guide.pdf
- f. **All files used:** Plugins and addons for construct2

IF the game you open need a plugin find the plugin in the folder and paste in the next location.

This game needs a lunarray.litetween plugin. Go to the folder All files used and put the plugin folder in the image location. Then you can start

1. How open project capx file?

- a. **You need personal license for Construct 2!**
- b. You need latest version Construct 2 (v.200).

You can find program here: <https://www.scirra.com/>

And buy license here (129.99\$): <https://www.scirra.com/store/construct-2>

Full manual is here: <https://www.scirra.com/manual/1/construct-2>

After install and run program, you can open **THE CAPX** file with project!
Choose File > Open and select **THE CAPX** in Source folder.

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

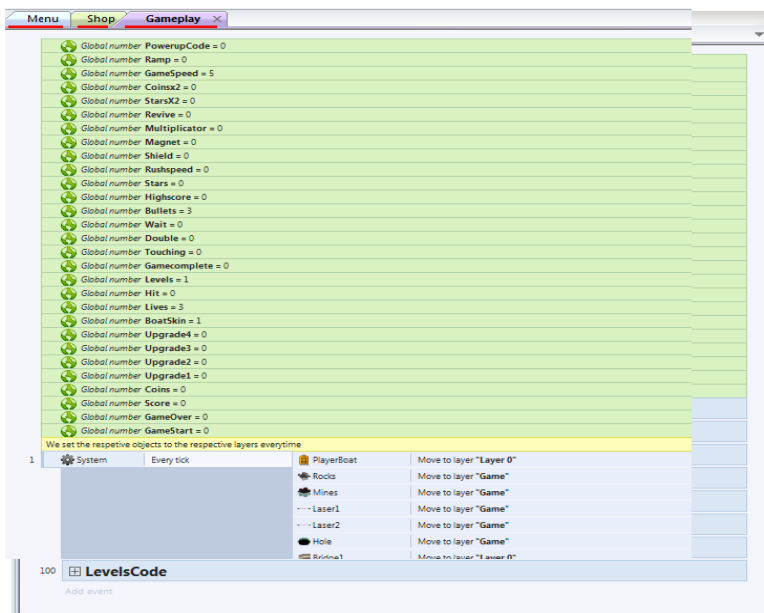

Game project contain primary elements:

- Menu Scene
- Levels Scenes
- Shop Scene
- Player boat (collisions, Movements, items, etc)
- Gameplay interface (Huds, scores, etc)
- Restart Game
- Save - Load System

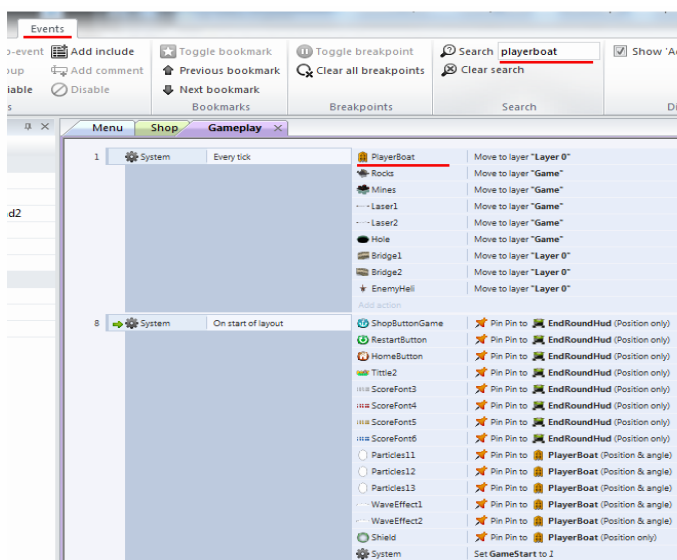

All events placed in functional groups with detailed comments.

For working with game events see event-sheet "Menu"

Project has 3 event- sheets, 1 for Menu and gameplay and other for Shop

For easy finding events, use search, just type name of the code from project and you can see all events with this object!

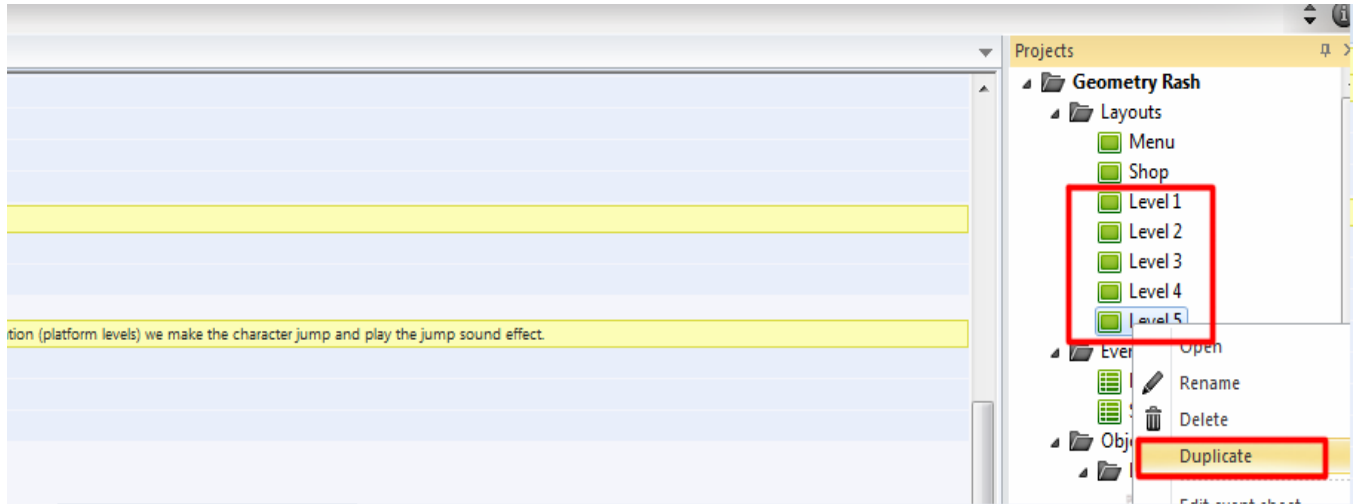

FROZENNNN GAMES

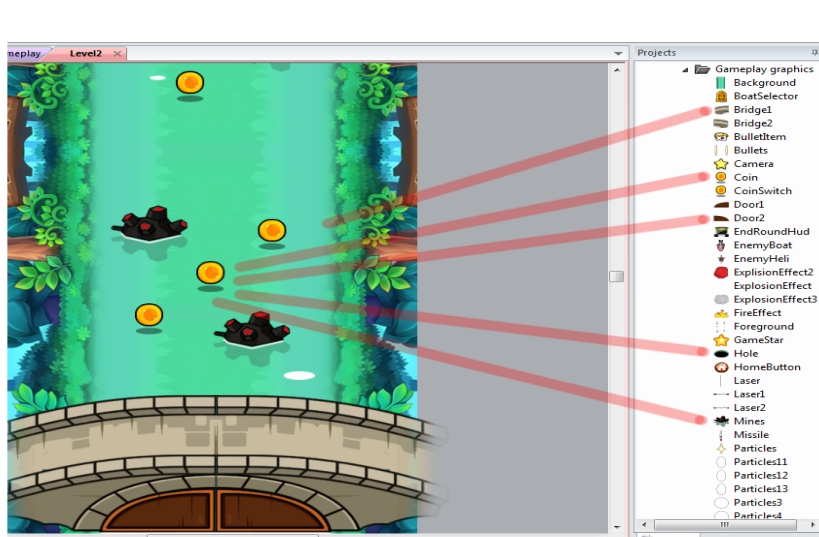

QUICK START DOCUMENTATION GUIDE

Add More Levels to the game.

The game contain 4 Premade Levels to play and you can add as you want. First duplicate one and edit as you want, then only add the code "gameplay" and then its ready for use.

once you create the new level, open the level and replace what you want.

When you have the level ready to play, Add the respective code to the level

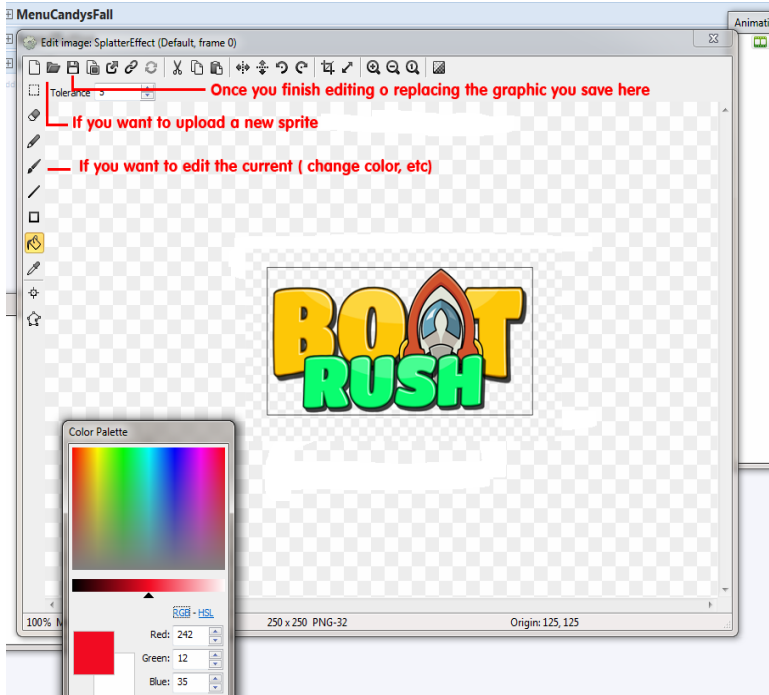

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

2. Re-skin game.

1. Just find the object you want edit and double click on sprite
2. In opened sprite editor window, you can replace image

Make sure that new sprite have equal size, anchor points, and correct collision mask.

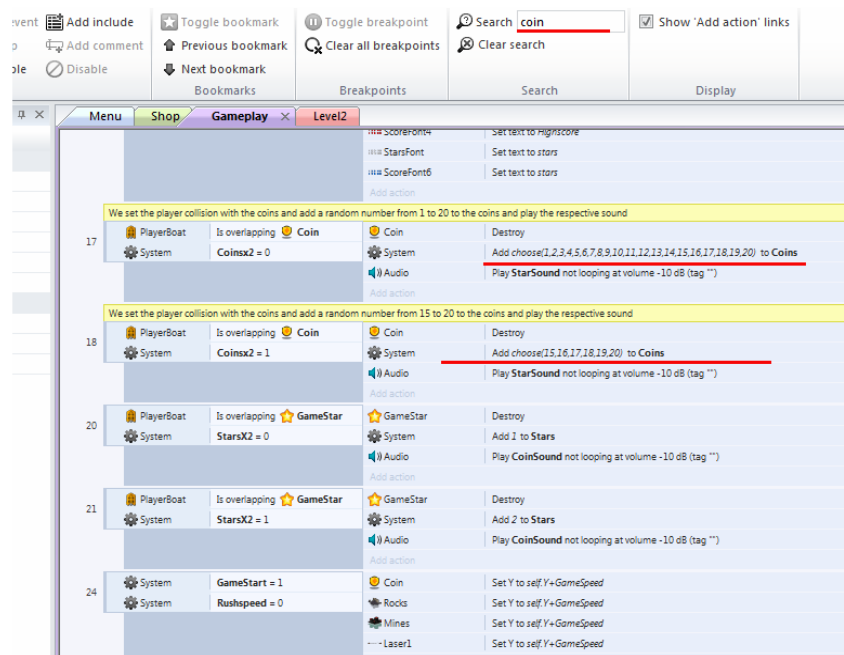

3. Simple gameplay customize.

You can easy setup gameplay just search the thing you want to change and edit from double click.

For example if you want to add more coins to the coin object or more speed to the game find the coin variable or gamespeed variable and edit with the values you want

FROZENNNN GAMES

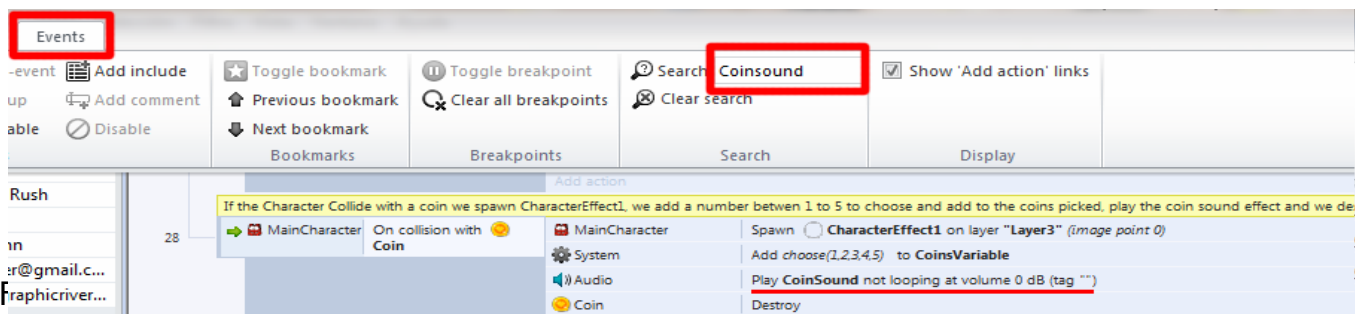

QUICK START DOCUMENTATION GUIDE

For example When you pick a coin you get 1 coin, you can change this variable to the value you want. See the image for more information.

4. Sounds

If you want to change sounds. First you upload the new sound in WAV. and then you search where that sound is played, like before in events, search

When you upload the WAV sound, Construct2 convert that WAV to ogg and m4a for Work on Browser and mobiles, so keep both files.

5. Game Layers

The Game contain 6 Layers so you can put the objects in diferent layers for example the Game buttons are in front of the background, other objects infront Buttons,etc

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

If you want to add more objects like foreground or other in front objects, create a new Layer, in the layer tab and add a new layer button.

7.Export to Mobile platforms

If you want to export the game to android follow the next steps, and dont forget to read the Lesson in the follosing links

Cordova export

Register and download Intel XDK, here:

<https://software.intel.com/en-us/html5/tools>

Read lesson here:

<https://www.scirra.com/tutorials/809/how-to-export-to-android-with-crosswalk>

Also, before export, you must adjust next project settings for export (for this choose project in project bar):

Project settings	
First layout	Game
Use loader layout	No
Pixel rounding	On
Preview effects	Yes
Window Size	768, 1024
Configuration Settings	
Preview browser	(default)
Fullscreen in browser	Scale outer
Fullscreen scaling	Low quality
Use high-DPI display	No
Orientations	Portrait
Enable WebGL	On
Sampling	Point
Downscaling	Low quality
Physics engine	Box2D asm.js
Loader style	Nothing (not recommended)
Preload sounds	Yes
Pause on unfocus	Yes
Clear background	No
More information	Help

Crosswalk version working stable on many platforms, but can freezes on weakly devices, and need really good optimization.

Ludei export

Register and create new project here: <https://sso.ludei.com>

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

More info here: <https://www.scirra.com/tutorials/303/how-to-export-to-cocoonjs>

Settings of the project can be same as for export to Cordova.

Test game after compilation on different devices! Cocoon JS is high performance but unstable compilation service.

8 .Export to HTML5

Very simple export for game!

Make project settings like:

First layout	Game
Use loader layout	No
Pixel rounding	Off
Preview effects	Yes
Window Size	1280, 720
Configuration Settings	
Preview browser	Firefox
Fullscreen in browser	Letterbox scale
Fullscreen scaling	High quality
Use high-DPI display	Yes
Orientations	Any
Enable WebGL	On
Sampling	Linear
Downscaling	Medium quality
Physics engine	Box2D web
Loader style	Percentage text
Preload sounds	Yes
Pause on unfocus	No
Clear background	Yes

And read here: <https://www.scirra.com/tutorials/655/tips-on-publishing-html5-games-to-the-web>

Choose in export window HTML 5 export.
