

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

Quick start

Candy Match Saga

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

For more code information read the Construct2 Manual and dont forget read All the game documentation commented in game events

Sources in archive:

Project`s archive has next folders:

- a. **Source:**
Candy Match Saga CAPX
- b. **Game Sounds:**
Sound files
- c. **Game Art:**
Graphic sources in PNG, icons and assets.
- d. **HTML5:**
Exported Game
- e. **Docs:**
Documentation.pdf
- f. **Plugins And Behaviors:** Plugins and addons for construct2

IF the game you open need a plugin find the plugin in the folder and paste in the next location.

If you need some other plugins or behaviors you can download here

https://www.scirra.com/forum/c2-plugins-and-behaviors-list_t6510?sid=60d5a991b56ebdf5

1. How open project capx file?

- a. **You need personal license for Construct 2!**
- b. You need latest version Construct 2

You can find program here: <https://www.scirra.com/>

And buy license here <https://www.scirra.com/store/construct-2>

Full manual is here: <https://www.scirra.com/manual/1/construct-2>

After install and run program, you can open **THE CAPX** file with project!
Choose File > Open and select **THE CAPX** in Source folder.

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

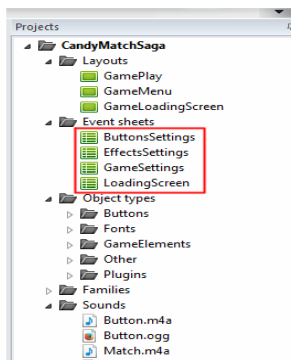

Game project contain primary elements:

- Menu Scene
- Gameplay Scene
- Loading Scene
- Candy match (collisions, Movements, effects, etc)
- Gameplay interface (Huds, scores, etc)
- Restart Game
- Save - Load System

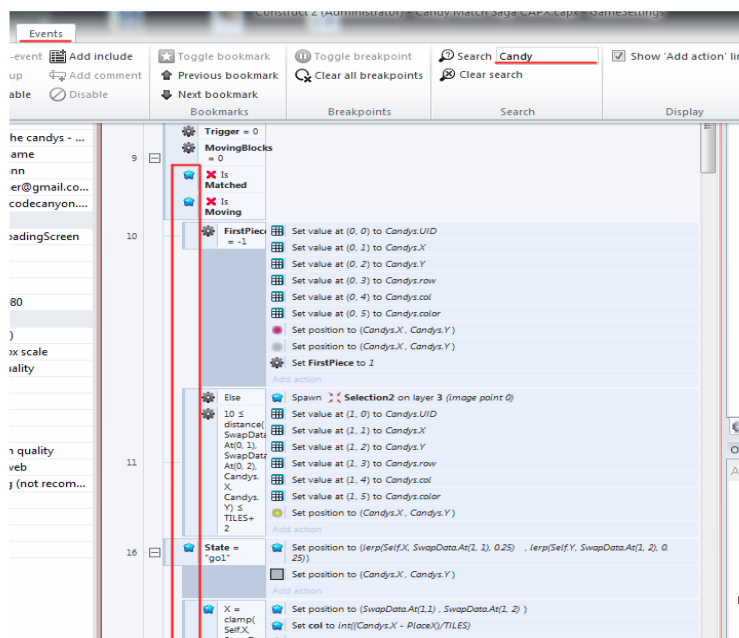

All events placed in functional groups with detailed comments.

For working with game events see event-sheet

Project has 4 event- sheets, Loading,Game,Effects,Buttons.

For easy finding events, use search, just type name of the code from project and you can see all events with this object!

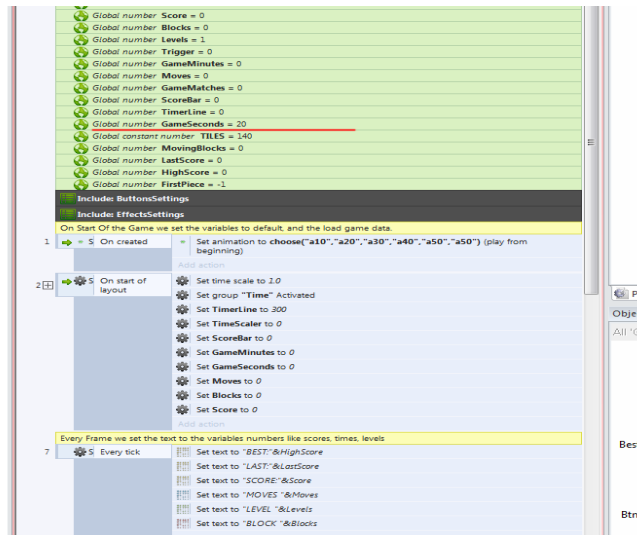

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

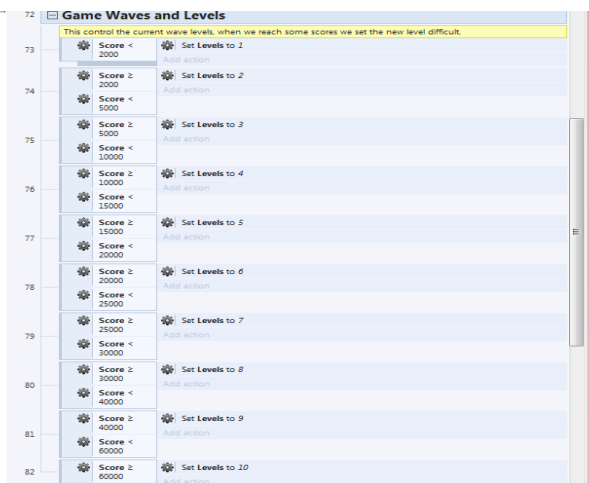

Change Game Score, Time and other variables

To change the game properties, you have to edit the game variables like the score
For example to add more time to the levels go to the variable and increase the number

When you find the variable, double click and edit the number for 30, so every level, Will have 30 second of time.

If you want to add more level go to the levels and waves sections and copy the last, level and replace the numbers for the new scores for a new game level.

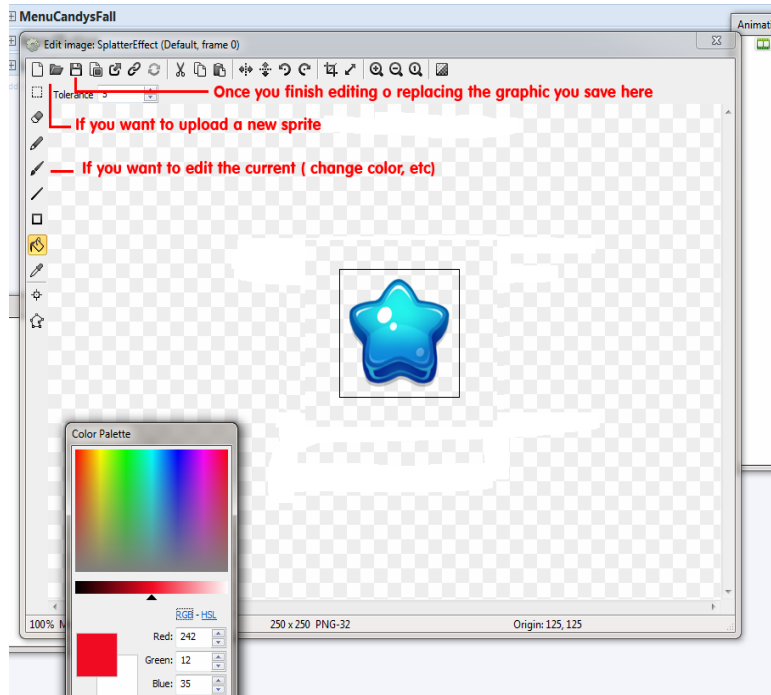

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

2. Re-skin game.

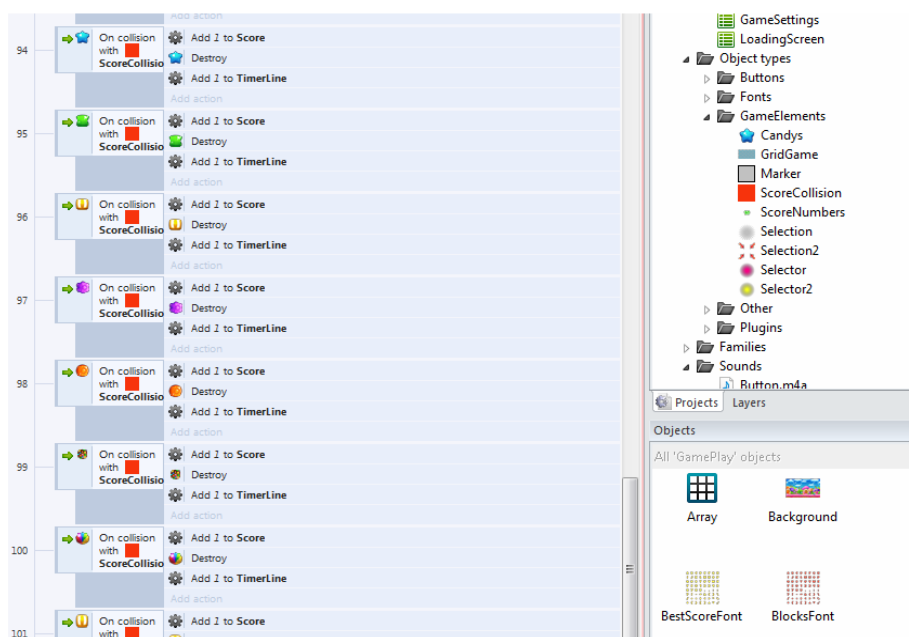

1. Find in project bar the object you want reskin and double click on sprite
2. In opened sprite editor window, you can replace image

Make sure that new sprite have equal size, anchor points, and correct collision mask.

3. Simple gameplay customize.

You can easy setup gameplay just search the thing you want to change and edit from double click.

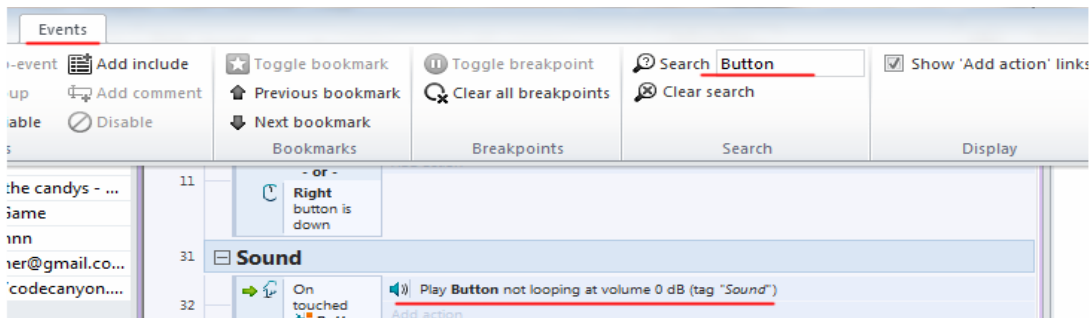

For example When you match 3 candys you earn 1 score, you can change this variable to the value you want. See the image for more information.

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

4. Sounds

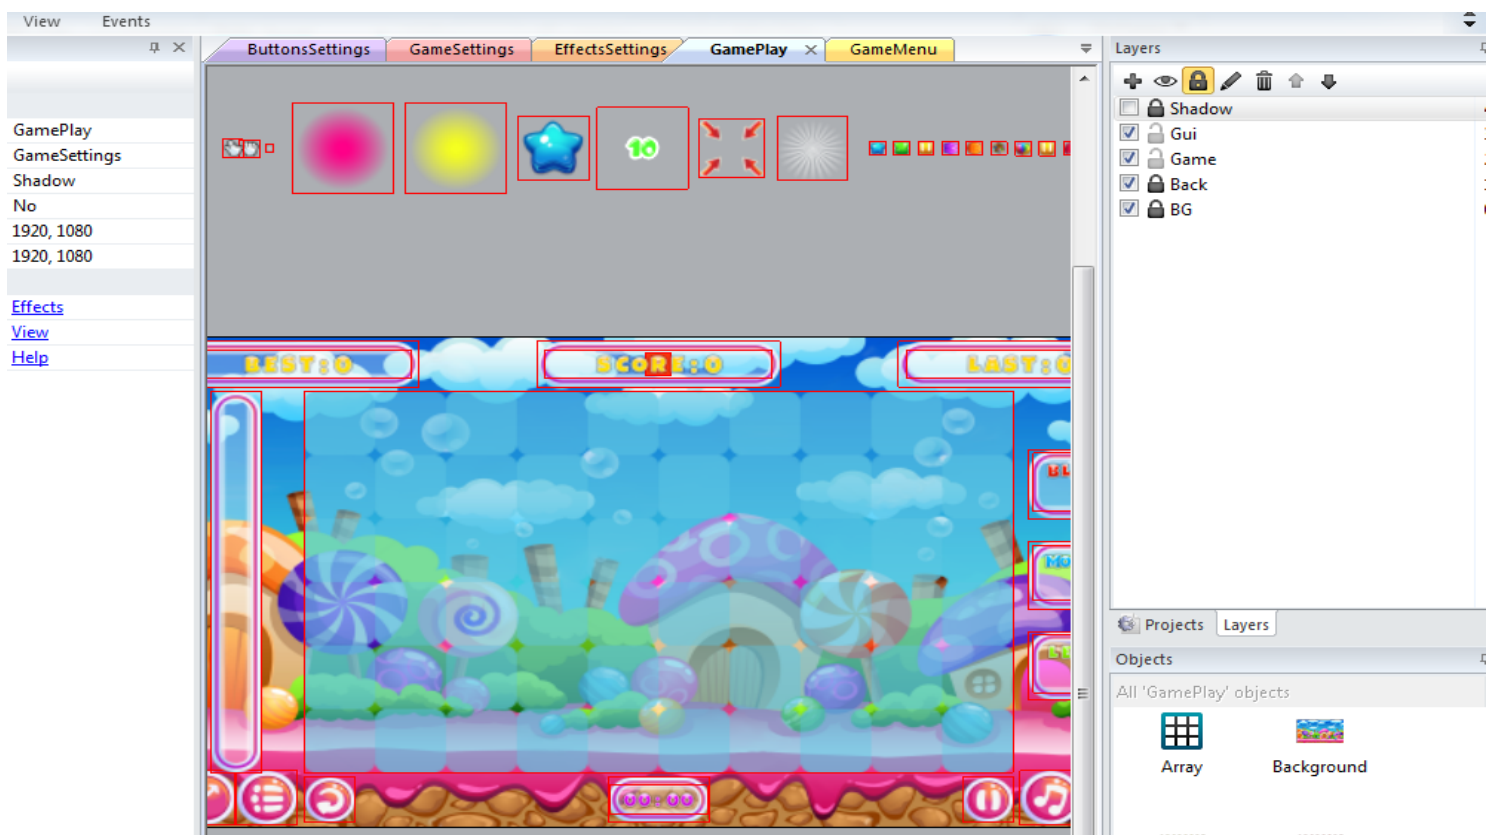

If you want to change sounds. First you upload the new sound in WAV. and then you search where that sound is played, like before in events, search

When you upload the WAV sound, Construct2 convert that WAV to ogg and m4a for Work on Browser and mobiles, so keep both files.

5. Game Layers

The Game contain 5 Layers so you can put the objects in diferent layers for example the Game buttons are in front of the background, other objects infront Buttons,etc

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

If you want to add more objects like foreground or other in front objects, create a new Layer, in the layer tab and add a new layer button.

7.Export to Mobile platforms

If you want to export the game to android follow the next steps, and dont forget to read the Lesson in the follosing links

Cordova export

Register and download Intel XDK, here:

<https://software.intel.com/en-us/html5/tools>

Read lesson here:

<https://www.scirra.com/tutorials/809/how-to-export-to-android-with-crosswalk>

Also, before export, you must adjust next project settings for export (for this choose project in project bar):

| Project settings | |
|------------------------|---------------------------|
| First layout | Game |
| Use loader layout | No |
| Pixel rounding | On |
| Preview effects | Yes |
| Window Size | 768, 1024 |
| Configuration Settings | |
| Preview browser | (default) |
| Fullscreen in browser | Scale outer |
| Fullscreen scaling | Low quality |
| Use high-DPI display | No |
| Orientations | Portrait |
| Enable WebGL | On |
| Sampling | Point |
| Downscaling | Low quality |
| Physics engine | Box2D asm.js |
| Loader style | Nothing (not recommended) |
| Preload sounds | Yes |
| Pause on unfocus | Yes |
| Clear background | No |
| More information | Help |

Crosswalk version working stable on many platforms, but can freezes on weakly devices, and need really good optimization.

Ludei export

Register and create new project here: <https://sso.ludei.com>

FROZENNNN GAMES

QUICK START DOCUMENTATION GUIDE

More info here: <https://www.scirra.com/tutorials/303/how-to-export-to-cocoonjs>

Settings of the project can be same as for export to Cordova.

Test game after compilation on different devices! Cocoon JS is high performance but unstable compilation service.

8 .Export to HTML5

Very simple export for game!

Make project settings like:

| | |
|------------------------|-----------------|
| First layout | Game |
| Use loader layout | No |
| Pixel rounding | Off |
| Preview effects | Yes |
| Window Size | 1280, 720 |
| Configuration Settings | |
| Preview browser | Firefox |
| Fullscreen in browser | Letterbox scale |
| Fullscreen scaling | High quality |
| Use high-DPI display | Yes |
| Orientations | Any |
| Enable WebGL | On |
| Sampling | Linear |
| Downscaling | Medium quality |
| Physics engine | Box2D web |
| Loader style | Percentage text |
| Preload sounds | Yes |
| Pause on unfocus | No |
| Clear background | Yes |

And read here: <https://www.scirra.com/tutorials/655/tips-on-publishing-html5-games-to-the-web>

Choose in export window HTML 5 export.
